

Product Number: 4301.07.15**DHS APPLICATION MAINTENANCE AND ENHANCEMENT**

Effective Date: July 1, 2015
Revision Date: May 5, 2014
Product Owner: Mark Brasher
Product Manager: Kevin Van Ausdal
Phone: 801-538-4024
E-mail: kvanausdal@utah.gov

This document describes the services performed by the application development staff assigned to DHS.

Product Features and Descriptions

Feature	Description
Support Day-to-Day Operations	Assist in resolving problems that impact day-to-day operation of DHS applications.
Database Support	Ensure the reliability and availability of application databases, and implement changes as required. Assist in correcting errors in the data.
Application Bug Fixes and Enhancements	Programming and unit testing of applications and interfaces to fix reported bugs, implement legislative changes, and add enhancements that are approved and prioritized by DHS.
Application Releases	Manage the implementation of changes to each application as a new release, applying project management principles appropriate to the situation.
Project Management	Identify work to be performed and expected outcomes for each release. Develop plans and schedules, then track actual work performed against the plan. Coordinate the efforts of all parties affected by the release including DHS and third parties. Communicate project status regularly to key stakeholders.
Service Request Tracking	Track all requests for changes or corrections to each application. Provide information to key stakeholders and priority setting groups as appropriate.
Analysis and Design	Apply design techniques and methods to business requirements provided by DHS to meet objectives. Raise issues to key stakeholders when decisions are required that may have a significant business impact.
Testing	Perform the first round of testing to ensure changes have been made correctly and the new release is ready for acceptance testing.

State of Utah
Product Description
Features Not Included

Feature	Explanation
User Training	DTS support does not include user training or training manuals. This service is provided by agency staff as required.
Application Help Desk	DTS support does not include a front-line application help desk. Application questions are first directed to assigned agency staff.

Rates and Billing

Feature	Description	Base Rate
Application Maintenance by DTS Staff	All hours reported as time worked each pay period, including overtime and on-call.	DTS Published Rate
Contract Staff	Supplemental staff hired from the private sector assigned to DHS.	Actual cost

Staff Resources

Feature	Explanation
Development Group Manager	Manages one or more development groups.
IT Analyst	Develops and maintains software; may function as project lead or key technical expert
IT Analyst – DBA	Manages database and schema changes, and assists with data investigation and correction when required.

DTS Responsibilities

Select the technologies used for each application and the best method for applying those technologies to meet the agency's needs.

Identify technical requirements and ensure resources are available. Ensure potential expenditures are identified early in the release process.

Coordinate all contracts, purchases and other efforts in support of the application maintenance process. This may include representing the agency when dealing with third party providers.

Provide training and tools that enable staff to perform the work.

Agency Responsibilities

Define business requirements for any requested changes to an application.

State of Utah

Product Description

Use the agreed-upon service request process and applicable tool to document application bugs and enhancement requests. Provide as much detail as needed for DTS to duplicate the reported problem or understand the desired enhancement.

Work cooperatively with DTS staff when setting priorities and working on releases.

Perform Acceptance Testing of each release, paying particular attention to bug fixes and requested enhancements that have been assigned to the release. Maintain test scripts and run regression tests on each release.

Evaluate the quality of each release and give final approval to deploy the release.

Provide application help desk support to all staff that use DHS applications. Escalate problems to DTS staff when required.

Update training manuals to reflect changes being made to the application. Train users as needed.

Service Levels and Metrics

Each year DHS will identify the amount of funding available for application development and maintenance. Each Development Group Manager will manage these services to fit within the available funding to the extent possible. This includes helping to set priorities, monitoring billable hours, and identifying funding concerns, including additional costs associated with support after normal working hours.

Each application release will have defined objectives and a project schedule. DTS and DHS will evaluate each release to determine if objectives have been met and the result delivered as scheduled.
